# Valves and Actuators 101

## Types, Considerations, and Applications

**Monday, March 31, 2025**

Noon – 1:00 pm CST | Please RSVP with the QR code by March 30

Learn the basics of different valves and types of actuators used in water and wastewater applications this free informational webinar!

This will include how different valves work, valve selection considerations, and applications. Also learn about manual and electric valve actuators and control considerations.

**Jon Harger**

Jon Harger serves as a Vice President at Mellen & Associates. He has been in the water industry since 1985 as a manufacturer, process equipment representative, and flow control representative.

*All attendees will be entered to win a drawing for a \$25 Amazon gift card at the end!*
