During the summer of 2005, M.U.D. used horizontal directional drilling to pull two 48-inch transmission mains from the Douglas County wellfield under the Platte River to the Saunders County wellfield. The \$10-million project enables water from the 26 wells in Saunders County to flow to the water treatment plant.

The District plans to use a similar trenchless technology, called micro tunneling, to install a 72-inch transmission main under the Elkhorn River in 2006.

HDR Engineering Inc. is the consulting engineering firm for the project. Alberici Constructors Inc. of St. Louis, MO is the contractor for the plant.

Contractors and subcontractors who worked on the 42 wells and two wellfields included: Allen Well Co.; Camden Excavating; Commonwealth Electric; Flowserve Pumps; Graham-Penn Co.; Grunwald Mechanical Co.; Garney Construction; JEO Consulting Group Inc.; Kirkham-Michael Consulting Engineers; Michels Directional Drilling; Northland Corrosion Services; Olsson Associates; S.J. Louis Co.; Sargent Drilling; Watts Electric and Williams Drilling Inc.

Please e-mail updates and revisions to mari_matulka@mudnebr.com. We will run revisions in Wise Water Words. Thank you to our advertisers for their continued financial support which helps bring our publications to Nebraska Section AWWA members.
